DD15 Turbo

Detroit DD15 Change Out Turbo

Detroit's proprietary turbocharger is a huge contributing factor to the overall reliability, durability, and performance of the engine. The turbocharger is optimally matched to the exhaust gas recirculation system for significant improvements in real-world fuel economy, without sacrificing any of the performance you've come to expect from the DD15. The DD15 turbo design has been streamlined for reduced weight and even greater efficiency and reliability.

When was the last time
you changed out your
turbocharger?

PERFORMANCE & ECONOMY DD16

600 HP
2050 LB-FT

Powering the Freightliner & Western Star X-Series range, Detroit engines balance power, productivity, and efficiency through a combination of a long-standing, stable engine architecture and targeted engineering refinements.

By retaining a consistent platform, component layouts remain familiar for workshops, supporting efficient servicing and long-term reliability.

Key design choices such as top-mounted EGR cooling for improved air and coolant management, cartridge type filters positioned above the chassis rail, and a proven EGR strategy, contribute to controlled emissions, reduced AdBlue consumption, and sustained engine longevity. This approach allows Detroit engines to deliver dependable real-world performance across a wide range of applications without unnecessary complexity or compromise.

New Detroit DD15 Engines

DDE E23565126 DD15 Argosy
DDE E23565128 DD15 122 Coronado

Detroit engines perform at their peak for kilometre after kilometre, with best-in-class fuel economy, and low-cost maintenance and service. Every step of our design, testing, and manufacturing process builds quality into every engine that bears the Detroit name. The focus of Detroit engineers is to achieve the most effective combination of performance and fuel economy. Their goal is to design and build engines that enable customers to operate their fleets more efficiently and ultimately to provide a lower cost of ownership. Our engine technology and enhancements offer an unprecedented level of efficiency. Purchase a new Detroit DD15 today and take advantage of our national two-year unlimited kilometre warranty. Ask your local Detroit dealer for a complete installed price.

DD15 ENGINE

VALUED AT RRP \$450

DD15 ¾ Remanufactured Engine

\$51,957

R23565049
CORE CHARGES APPLY

The ¾ DD15 & DD15 long block are the perfect solution in a range of circumstances, particularly beneficial for customers with non-functioning crankshafts, delivering time and cost savings through the replacement of the existing engine block and crankshaft. The ¾ engine is choice for DD15 engines built before 2016 and the long block is better suited to engines built after 2016. In addition to being an economically-favourable solution, these engine packages delivers the complete internal gear train and ease of installation with flywheel and flywheel housing being an exact match ensuring seamless bolting of engine to transmission. Warranty 12 months, 160,000 kms.

RECEIVE A FREE YETI
45L COOLER WITH EACH
¾ REMAN ENGINE AND
LONG BLOCK.
